FD/EMS from Brad Benard ...We had two calls this past month. On one of those calls the pumper 351 was throwing a transmission code and not shifting properly. Upstate looked at it and ruled out any type of easy wiring issue. Northbound in Gladstone was the next to get it, they ran more sophisticated diagnostics and wanted to rule out an abs sensor. They confirmed it to be a turbine speed sensor. That model of transmission is an internal sensor. Which is a big job having to drop the transmission main cover. Thankfully up international was willing to take it. It went in Monday and I expect it to be done this week some time. Upstate made one service call to the hall to make sure it was safe to drive. And they serviced it and did an

inspection on it also. I have sent what I have so far for invoices to Robin. Thank you_ *end of Brad report*

EMS from Ryan Knoph: 2 calls, 2 accidents...end of Ryan Report
